

HY-ROAD™ 300

BUILDING LEGACIES

At Storm, we are constantly challenging ourselves. We understand that if we take it to the limit with tall aspirations, the end result will never be less than extraordinary. Decades of immeasurable effort spent in research and development has produced equipment that has withstood the test of time. It is our rightful duty to lead, innovate, and produce quality products that are worthy of your passion and enthusiasm.

TAKING THE HY-ROAD

There comes a time in every bowler's career when they need to make a decision. Where is bowling going to take me? What arsenal do I bring to the biggest tournament of my life? What is going to be my next investment to the sport? If you've asked yourself any of these questions you can rest assured that Storm will be by your side every step of the way.

The Hy-Road is more than just a bowling ball. It is the longest running piece of equipment still being manufactured in Brigham City, Utah. Eight years of longevity is not without merit, however. If you've been fortunate enough to roll any ball with the title "Hy-Road" in it, you can appreciate its impact on the bowling scene. Speaking of impact, Inverted Fe² Technology has a higher coefficient of restitution versus most other bowling balls due to the lack of core material between the weight block and coverstock.

R2S coverstock material is synonymous with the Storm name. Found on some of the most successful balls in recent history, R2S glides through the early part of the lane with the most dynamic breakpoint shape found in today's modern game.

The Hy-Road 300 epitomizes innovative technology combined with fine workmanship. That's why we are "The Bowler's Company™."

TECHNICAL DATA

COVERSTOCK

R2S™ Pearl Reactive

WEIGHT BLOCK

Inverted Fe² Technology™

FACTORY FINISH

2000-grit Polished

BALL COLOR

2-tone Blue

FLARE POTENTIAL

5-6" (High)

FRAGRANCE

Wildberry Cheesecake

"The Hy-Road is more than just a bowling ball. It is the longest running piece of equipment still being manufactured in Brigham City, Utah."
